**GEYSER**

The GEYSER is designed for complete ultrahigh reach dust control. The GEYSER installation will piggy-back off the 25HP pump standard on all V-500 series equipment. The GEYSER catches dust at the source, and the V-500 fan corrals the remaining debris as it hits the ground.

The GEYSER has remote control variable flow capabilities ranging from 5 to 80 gallons per minute, and adjustable spray angles allowing for a distance of 5 to 30 feet.
